Peha-haft® Latex Free Cohesive Conforming Bandage
For safe and effective dressing retention

Peha-haft and Peha-haft® latex free are cohesive, elastic conforming bandages specifically designed to facilitate all kinds of dressing retention. Breathable fabric with a special double adhesive effect means that the bandage sticks to itself, but not to skin.

85% extensibility with a high absorption capacity due to a high number of natural fibres, the bandage consists of 40% Cotton, 30% Viscose and 30% Polyamide

Benefits:

- Provide safe dressing retention even on joints and conical or round body parts.
No additional fixation of the bandage needed.
Cost saving due to low consumption of material.

There is only one thing you can do against latex allergy: Avoid Latex

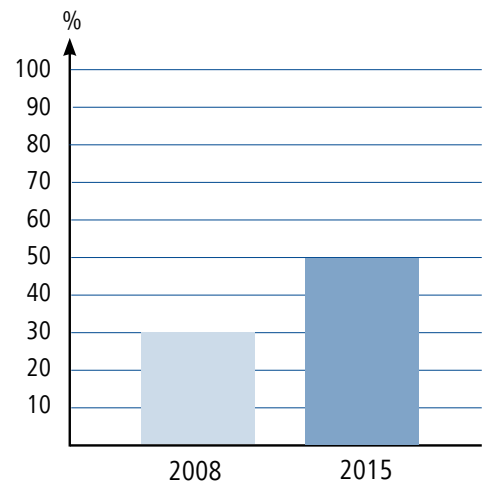

In Europe about 30% of the population suffer from allergies. The immediate allergy to natural latex rubber is widely spread and presents a considerable problem in health care.

Peha-haft® latex free offers perfect protection for staff and for patients.

Indication

For fixation bandaging, especially on joints and conical or round parts of the body; retention of wound dressings and of orthopaedic padding material, cannulae, etc and for use as support bandage providing light compression.

Development of latex allergies
